

## KRIS-TECH TRACERSPACER

### BENEFITS & FEATURES

- ✓ Made of durable HDPE
- ✓ Increases accuracy of future PE pipe locating by ensuring that tracer wire remains within 6" of PE pipe
- ✓ Eliminates possibility of tracer wire contact with PE pipe
- ✓ Prevents tracer wire from becoming displaced during backfilling, thus reducing third party damages
- ✓ Ensures code compliance with National Electric Safety Code (NESC) 49 CFR Part 192.321 and NFPA58
- ✓ Well-suited for URD projects to keep utilities safely separated and organized
- ✓ Requires no extra digging or sand padding and can be used in all soil conditions

### APPLICATION

The Kris-Tech TracerSpacer is a simple, low cost, snap-on device designed to provide a consistent separation between plastic pipe and its tracer wire. It is for use on natural gas, propane, water, sewer, fiber and irrigation piping.

Using the Kris-Tech TracerSpacer virtually eliminates the possibility that the tracer wire can be in direct contact with the plastic pipe while ensuring an accurate and reliable locate of the pipe in the future.

### PRODUCT DESCRIPTION

The Kris-Tech TracerSpacer is constructed from durable high-density polyethylene (HDPE) and is available in the following sizes to fit pipe and conduit: 1/2", 3/4", 1", 1 1/4", 2", 4", and 6". A universal adjustable size is also available for large diameter pipe 8" or greater (zip ties not included).

### QUALITY ASSURANCE

All Kris-Tech products are manufactured with strict quality control to ensure all components are defect-free and meet or exceed performance requirements.
