SCOPE

This stranded stainless steel single conductor tracer wire is insulated with high molecular weight polyethylene (HMWPE) and is suitable for directional drilling applications. It can also be used as a standard tracer wire for locating underground utilities and assets, including non-metallic pipes and cables.

CONSTRUCTION

Conductors: Single conductors are 49 (7x7) stranded annealed type 304 alloy stainless steel.

Insulation: Conductors are insulated with a concentrically applied HDPE (high density polyethylene).

IDENTIFICATION AND PACKAGING

Print legends on the wire include the manufacturer, conductor size, voltage rating, UL symbol (if applicable) and type designation. Standard length spools are 500 or 2500 feet.
